Your insight on biomass from the raw stock
to your pelleting was very informative. It gave
us ideas to bring back to our facility in
Minnesota. Thank you for your great hospitality.
It was much appreciated!

Your project is most impressive! We have learned much and have many ideas. Thank you for your time and your hospitality. I look forward to many more meetings on both sides of the pond.

The opportunities for biomass energy are exciting. It is a privilege to be involved in this new relationship.

— Jim Barbour, Univ. of Minnesota, Morris

Many Thanks.
